

Design specification

Approved revision 05 | All dimensions in millimetres

Ring bore	18.00 nominal diameter
Stone diameters	5.00 centre / 2 x 2.50 sides (nominal)
Overall assembly	21.42 x 6.00 x 23.28 (measured)
Lower shank	2.50 width / 1.70 radial thickness (sampled)
Casting pattern	21.42 x 6.00 x 23.08 (measured)
Prong stock minima	0.94 centre / 0.79 sides (sampled)
Proposed material	18k yellow gold; clear presentation stones
Proposed process	Castable resin/wax pattern, then metal casting

Dimensions taken from the approved CAD model; views are not printed to scale.
Stone profiles are nominal. A jeweller must fit actual stones and finish the settings.
Casting compensation and physical print, casting and wear validation remain pending.
