

ADESINA ADEBOLA

Freelance 3D Animator

2022–Present

deybor4l@gmail.com

deybor.github.io/portfolio/film/

[Film samples \(Google Drive\)](#).

Freelance 3D animator creating automotive explainers, documentary reconstructions and product films. Handles scene staging, animation, camera composition, lighting and rendering, with an emphasis on clear visual storytelling.

SELECTED ANIMATION PROJECTS

Lotus 7 | Automotive animation sample | 01:12

Created a Blender drivetrain sequence with engine and gearbox reveals, first/neutral/second gear comparisons and explanatory power-flow graphics.

Used camera holds and selective part emphasis to present each mechanism, with credited vehicle and representative mechanical assets.

Flight 705 | Client project - documentary animation | 02:07

Created airport scenes, route graphics and a cockpit reconstruction for a documentary sequence. Produced the 3D imagery and animation presented alongside interview footage.

ProphetBots | Client project - product animation | 01:21

Created a character-led product sequence featuring device interactions, product close-ups and interior scenes. Handled the 3D production, from scene staging to final rendering.

TOOLS AND CAPABILITIES

Blender | DaVinci Resolve | Adobe Photoshop

3D animation | Scene staging | Camera composition | Lighting and rendering

EDUCATION

Mechatronics Engineering student

Bells University of Technology
