

Assembly dimensions

Orthographic line drawings of the pre-setting metal body, with a measured lower-shank section.

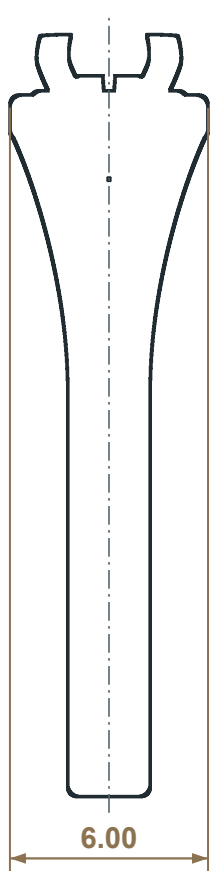

FRONT / X-Z

Projected metal outline and bore

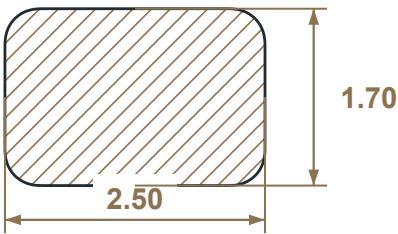

SIDE / Y-Z

Metal envelope; 6.00 mm depth

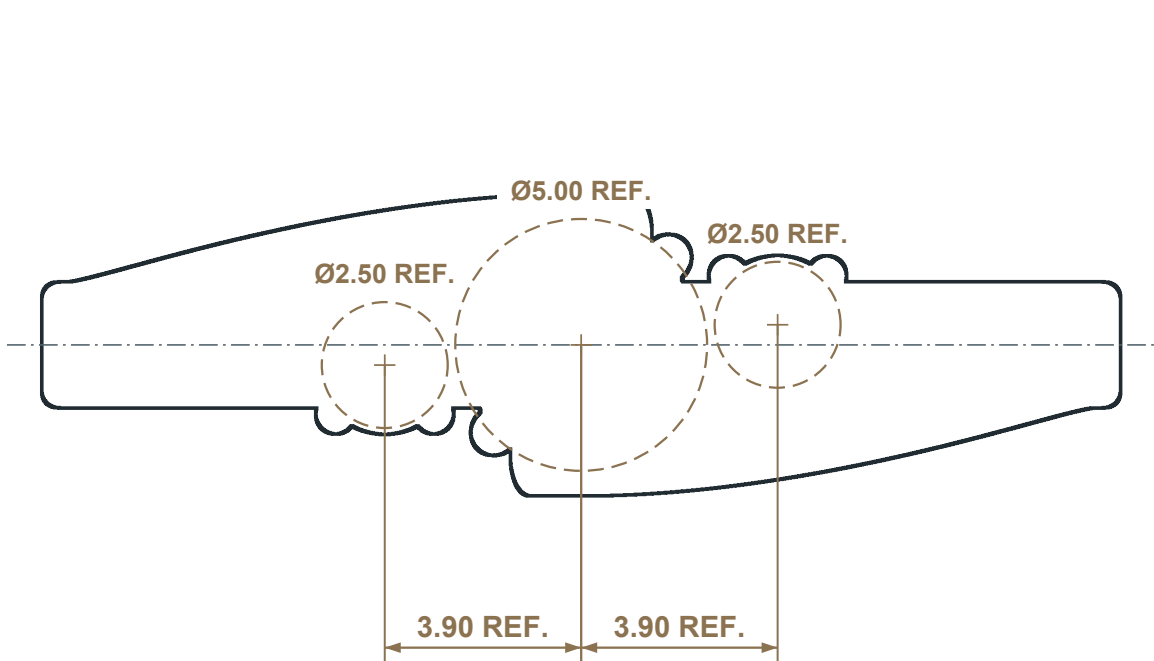

D-D / LOWER-SHANK DETAIL

Local cut at X = 0; dimensions measured in CAD

TOP / X-Y

Metal envelope / nominal stone layout

Dashed circles show nominal stone sizes; dimensioned spacing gives horizontal X offsets. Construction views and gallery details are shown on sheet 03.

LOWER SHANK

2.50 mm axial width × 1.70 mm radial thickness at the indicated section. The enlarged cut shows the actual rounded profile.

A local section describes this location; it does not establish the minimum thickness of every gallery or junction.

Feature	Value (mm)	Basis
Body envelope	21.42 W × 23.08 H × 6.00 D	Measured pre-setting metal body
Bore / lower shank	Ø18.00 / 2.50 axial × 1.70 radial	Nominal bore / measured local CAD section
